EXPERIENCE

Senior Mobile Engineer, xFarm

January 2025 – Present, Milan

Senior Mobile Engineer in the **Connect & Machinery** tribe, developing mobile features for **IoT-enabled agricultural machinery**, including **telemetry visualisation**, **real-time monitoring**, and **remote device control**. I work cross-functionally with backend and firmware teams to deliver reliable, scalable mobile experiences and contribute to architectural decisions and code quality across the mobile platform.

Engineer Manager, Young Platform

July 2023 – January 2025, Turin

Recently promoted to **Engineer Manager**, I led a dynamic team of 5 professionals, overseeing their growth and fostering collaboration. Embracing the challenge, I am actively enhancing my skills in team **leadership** and project delivery. My responsibilities include guiding the team towards successful feature development while maintaining a focus on cohesive and efficient teamwork.

Mobile Engineer, Young Platform

July 2019 – July 2023, Turin

As a member of the Young Platform team, I specialize in the development of YP Step, an educational app designed to enlighten users about cryptocurrency and financial principles. Proficient in **Flutter**, I contribute to the app's architecture, ensuring a seamless experience for our user base of **500k**. Additionally, I took charge of implementing comprehensive **CI/CD pipelines** for our app projects, streamlining the development process and ensuring efficient delivery of updates and features.

Web Developer, DTT

February 2019 – June 2019, Amsterdam

During my internship at DTT, I played a key role in **web development**, focusing on the creation of a dynamic website dedicated to fortune-telling. Utilizing **Vuejs** as the primary framework and incorporating **TypeScript**, I contributed to the design and implementation of interactive features. This experience enhanced my skills in front-end development, allowing me to apply modern technologies to real-world projects in a collaborative and innovative environment.

EDUCATION

Higher technical diploma, ITS ICT Foundation

2017–2019, Turin

Web & mobile app development
